

# Flutter – How to Center Align text in Text Widget?

## Flutter – Center Align Text in Text Widget

---

The default alignment of text in a Text widget is left.

And sometimes, based on the design requirements or some other situations, you may need to align the text in a Text widget to center.

In this tutorial, we will align the text in a Text Widget to center.

To center align the text in a Text widget, provide `textAlign` property with value `TextAlign.center`.

```
Text(  
  'Hello World!',  
  textAlign: TextAlign.center,  
)
```

## Example – Center Align Text in Text Widget

---

In this example, create a basic Flutter Application and replace main.dart with the following code.

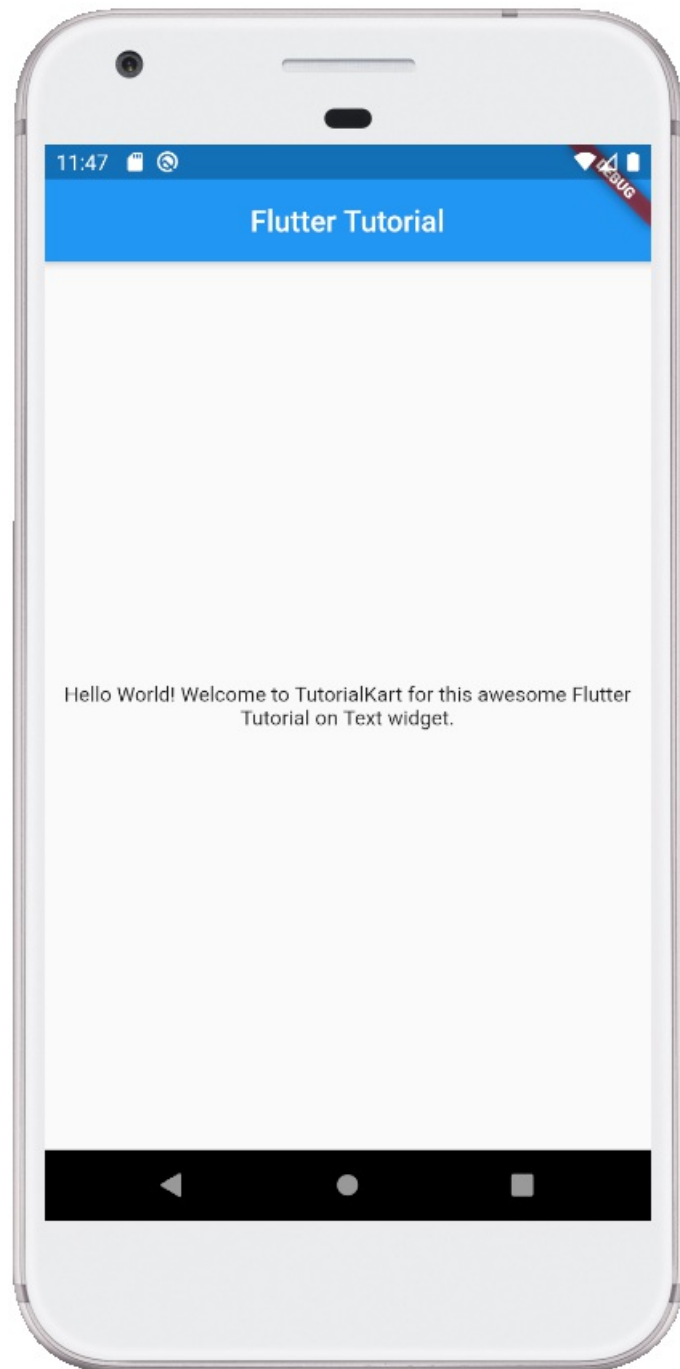

**lib/main.dart**

```
import 'package:flutter/material.dart';  
  
void main() => runApp(MyApp());  
  
class MyApp extends StatelessWidget {  
  @override  
  Widget build(BuildContext context) {  
    return MaterialApp(  
      title: 'Flutter Tutorial',  
      home: Scaffold(  
        appBar: AppBar(  
          title: Center(  
            child: Text('Flutter Tutorial'),  
          ),  
        ),  
        body: Center(  
          child: Text(  

```

```
'Hello World! Welcome to TutorialKart for this awesome Flutter Tutorial on T
textAlign: TextAlign.center,
),
),
),
);
}
}
```

## Screenshot

## Conclusion

In this [Flutter Tutorial](#), we learned how to align text of Text widget at center.
